## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. Claims 1-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification, as original filed, does not provide support for the invention as is now claimed. The original specification does not disclose that “the polymer layer is arranged in a manner which causes a portion of the polymer layer to deform in response to a change in electric field that is applied via at least one of the first compliant electrode layer or the second compliant electrode layer and wherein a portion of the polymer layer is capable of an elastic area strain of at least about 10% between a first portion of the polymer layer with a first area and a second position of the polymer layer with a second area”.

### *Response to Arguments*

2. Applicant's arguments with respect to claims 1-33 have been considered but are moot in view of the new ground(s) of rejection.

The original specification does not claim that a portion of the polymer layer is capable of an elastic area strain of at least about 10% between a first portion of the polymer layer with a first area and a second position of the polymer layer with a second area.

Art Unit: 2643

As argued in on page 5 in the Remarks, in col. 3, lines 13-18 and 39-47, and col. 6, lines 29-33 of the U.S. patent 6,343,129, “the dielectric materials with the aforementioned properties (e.g. silicone rubbers) have produced strains over 25%”, and “this material has developed over 30% strain in the two orthogonal in-plane directions. Such a strain corresponds to over a 69% increase in the film area”. There is no disclosure for the range of the strain of at least 10% as claimed in claim 1 now.

### ***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
